Bel Fuse transfer power products from Slovakia to China (GongMing) facility

Dear End-Customer or Sales Channel Partner,

We are writing to you because our records show that you recently bought Power Products which are currently manufactured in our Slovakia facility.

As part of continuously developing our manufacturing strategy, Bel are transferring **Front-End** Power Products from Slovakia to GongMing, the existing manufacturing facility for other DC-DC and AC-DC products. Initially there may be parallel manufacturing capacity, after this, they will be exclusively manufactured in GongMing.

This notice comprises the following products (currently only from Slovakia) :-

PAL300-56
PFE1100-12-054NDS331
FXR-3-48G
FXR-3-48S101G
PFE1100-12-054NDS387
PFE1100-12-054SD

Timing varies by product and further PCNs may be issued with further details.

We are planning and executing this transfer very carefully over the next **4-8 months** to minimise any possible disruption and to improve production lead-times.

If you have any questions or special requirements about our qualification or approval process, please do not hesitate to contact your Bel Power Solutions & Protection Customer Service Team, who will be able to answer your queries or redirect any questions they cannot answer to the appropriate Bel person.

We would also like to take this opportunity to thank you for your business in the past and to assure you that everything we do is aimed at becoming your power supply partner of choice in the future.

Yours faithfully

Dara Crowe
Product Manager
